

# How To Document

## Program Run

Run the backend project.

Run the front end project by typing 'npm run serve' in the terminal.

Click the link that appears in the terminal

## Operators

### No operand

1. (CE) clears everything.
2. (C) clears everything.
3. (Backspace) removes the last digit.

### One operand

Takes one operand by writing the operand and then click the button.

1. (%) divides the operand by 100.
2. (1/x) gets inverse of it.
3. ( $x^2$ ) gets it's square.

4. ( $\sqrt{x^2}$ ) gets it's square root.

5. ( $\pm$ ) multiplies by -1.

### **Two operand**

Takes two operand by writing the first operand and the operation then the second operand.

1. ( $\div$ ) divides the first operand by the second one.

2. ( $\times$ ) multiplies the first operand with the second one.

3. ( $-$ ) subtracts the second operand from the first one.

4. ( $+$ ) adds the first operand to the second one.

When errors occur it shows "E"
